

CSS – Assessment 5

Task

1. How to set Justify property in the paragraph elements?

To justify text in a paragraph we can use the css with text-align:justify on the paragraph element.

Example:- p{

```
text-align:justify;}
```

2. How to add shadow to text?

To add shadow to text in css, use the css property text-shadow.

Example:

P1{

```
text-shadow: 5px 5px 5px red;
```

```
}
```

3. How to specify all the font properties in one declaration?

By the font shorthand property .

Example:

P{

```
Font: italic strong 15 px Georgia, sans-serif;
```

```
}
```
